**Access Start Date**    11/2/2022

**Access End Date**    11/3/2023

Welcome to **Interface Replay™**. This site allows you to log in and watch a recording of your live class.. This service is only available for students that attended the class and is valid for the access period specified above. Of course, this login should not be given to anyone that did not attend the class. Also these recordings should not be copied and/or distributed.

Each day is split into a morning and an afternoon recording. Both recordings are available about an hour after the class ends that day.

During the access period, the password could be reset for security purposes. Just click on the **Trouble Logging In?** button on the login screen and enter your name, class information and your email address.  This will automatically notify Interface of your need for the updated credentials.  The latest credential will be emailed to you. Or during business hours, you can call Interface at **602-266-8510** to receive the new password.

We hope this feature will bring added value to the attendance of your class.

Thank you for using Interface for your training needs.
